Industrial Design 2

Design Investigations

Application

Entrance Exam 2023 Special Task
Design your robot companion and hand it in as part of your portfolio!
Your proposal should be an interesting interpretation of this topic, looking at the human-machine relationship. We can't wait to see your ideas!

Dates for the Online Registration and Portfolio Submission
We evaluate students based on their portfolio. Submit your digital portfolio (one PDF max. 50MB) 11th - 27th at 12.00 p.m. (midday) January via the central registration tool of the University of Applied Arts Vienna https://application.uni-ak.ac.at . If you have links to videos on f.e. vimeo or youtube or your homepage please embed these links.

It's important to make a design-specific portfolio that represents you, your skills, interests and experience. Your portfolio should represent yourself, your talents and the way you think and work. Make a design-specific portfolio that shows the concepts of your projects (maybe you do not have the skills yet to deliver a perfect project but a short text can illustrate the ideas behind it). Less is more: focus on the design-essentials and only show work you are really proud of.

Announcement
The invitation to the entrance exam will be send out on the 3rd February.

Process of Entrance Exam
Following your portfolio submission, from 28th February to 2nd March 2023 between 10 - 6 o'clock candidates will work on a number of design-related tasks. These may include modelling a "natural" object, ideation skills in small teams and a quick design task of an everyday object (hardware and/or software). Additionally, interviews will be conducted to determine your motivation and educational background, cultural and conceptual talents as well as communication skills. Then we'll select our future students.
